DETAILED ACTION

Response to Amendment

1. In response to the Amendment received on December 19, 2003, the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claims 3, 5 and 7-9.

Response to Arguments

2. Applicant's arguments, see Amendment, filed December 19, 2003, with respect to claims 1-9 have been fully considered and are persuasive. The rejection of claim 9 under 35 USC 102(e) and under 35 USC 102(b) as being anticipated by Takami et al (6,166,101 and JP 11-152441, respectfully) has been withdrawn. The rejection of claims 1-2 under 35 USC 102(b) as being anticipated by Takami et al (US 5,721,020) has been withdrawn. The prior art fails to teach an adhesive compositions comprising bis ((1-ethyl (3-oxetanyl)) methyl) ether in combination with conductive particles. While the prior art teach adhesive compositions comprising oxetane compound, the prior art does not expressly teach and/or fairly suggest using bis ((1-ethyl (3-oxetanyl)) methyl) ether.

Allowable Subject Matter

3. Claims 1-2, 4 and 6 are allowed.

4. The following is an examiner's statement of reasons for allowance: The primary reasons for the allowance of the instantly claimed adhesive composition is the combination of conductive particles with the oxetane compound, bis ((1-ethyl (3-oxetanyl)) methyl) ether. While the prior art teaches oxetane containing adhesive compositions, the prior art fails to expressly teach and/or fairly suggest using bis ((1-ethyl (3-oxetanyl)) methyl) ether as the oxetane compound, nor does the prior art teach said compound combined with conductive particles in an adhesive composition for use in electronic parts, such as circuit boards.
